N O T I C E

Newark's Highway System is now under critical study.

The N.J. Department of Transportation has commissioned a study of Newark's Highway Access. This analysis, which began recently, is an attempt to improve access to our downtown area (CBD) for commuters, shoppers and others.

The study will examine four major corridors: Interstate Route 280 and a connector from Rte. 280 to the central business district, Rte. 21 (McCarter Highway); and a connector from Interstate Rte. 78 to the CBD. Possible interchange modifications on I-78 will also be examined, especially in the areas of Belmont/Hillside Avenues and the Garden State Parkway.

Your input is extremely valuable to this project. Please urge as many of your employees as possible to participate by attending an "information center" and encourage them to raise questions and suggest alternatives to the Department and Consultant's representatives who will be in attendance.

The session will be held -

Tuesday, July 11, 1978
8:30 am - 4:30 pm
Dryden Hall
Prudential Insurance Co.
745 Broad St.

For more information call - Larry Hecker (Greater Newark Chamber of Commerce) 201-624-6888 or Pat Bontempo (NJ Dept. of Transportation) 609-292-6802.
